

Hosted SharePoint Foundation 2013

Onsyte's SharePoint Foundation 2013 hosting is a cost-effective way to implement and manage a high-performance website, intranet, extranet and/or project management collaboration environment. The familiar, web-based interface and close integration with everyday tools (Microsoft Office, our hosted Exchange solution, Lync, etc.) makes SharePoint Foundation 2013 easy to use and easily deployable.

Connect people with the information and resources they need. Users can create team workspaces, coordinate calendars, organize documents, and receive important notifications and updates through communication features including announcements and alerts, as well as the new templates for creating blogs and wikis.

COLLABORATION	MANAGEMENT	SECURITY	BENEFITS
<p>Access important files securely, share documents with colleagues, manage project better and make your site look professional in a snap!</p>	<p>Set top-down policies for better content recovery and users, groups, and team workspace site administration.</p>	<p>Site life-cycle management, site memberships and permissions, and storage limits.</p>	<p>Familiar Office authoring experience</p>
